

KIRUBANANDHAM S

Frontend Developer

+91 6381547453 | kirubanandhamskiruba@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESIONAL SUMMARY

Motivated BCA graduate with strong interest in frontend development and a good understanding of HTML, CSS, JavaScript, and responsive web design. Skilled in creating clean, user-friendly web pages and continuously improving knowledge in modern frontend technologies. Quick learner with problem-solving ability, teamwork skills, and a passion for building attractive and functional web applications. Seeking an entry-level frontend developer role to apply my skills, learn from real-time projects, and contribute to organizational growth.

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, REST API Integration

Backend & Databases: Node.js, Python Flask, SQL, MongoDB

Tools & Practices: Git, GitHub, REST APIs, Canva

PROJECTS

CodeQuiz — Programming Languages Quiz Application MERN Stack | 2026

- Situation: Identified the lack of an engaging, real-time platform for developers to test programming knowledge interactively.
- Task: Architected and built a full-stack quiz application from scratch using MongoDB, Express.js, React.js, and Node.js, serving as the sole developer.
- Action: Designed a responsive React.js UI with component-based architecture; implemented JWT-based secure authentication, RESTful API endpoints for quiz CRUD operations, and a score-tracking dashboard backed by MongoDB.
- Result: Delivered a production-ready application featuring secure login, dynamic quiz management, and real-time score feedback — demonstrating end-to-end React and REST API skills directly relevant to Swish's frontend stack.

Riyaz Cars — Online Car Booking System HTML · CSS · JS · Python Flask · SQLite | 2025

- Situation: Needed a lightweight web platform that lets customers browse and book vehicles online without manual coordination.
- Task: Built a full-stack web application end-to-end, handling both the frontend UI and the Python Flask backend with database integration.
- Action: Created an intuitive HTML/CSS/JavaScript frontend with responsive design; engineered secure user registration and login flows, and integrated SQLite for real-time booking state management via REST-style routes.
- Result: Delivered a functional booking portal with zero reported login/booking bugs — reinforcing proficiency in responsive design, secure authentication, and API-backed state management.

EDUCATION

BCA — Sree Saraswathi Thyagaraja College, Pollachi 2023 – 2026

CGPA : 7.8 | Coursework: Web Technologies, DBMS, Data Structures

HSC — Government Higher Secondary School, Dharapuram 2021 – 2023

Percentage: 83.5%

CERTIFICATIONS

Database Management System — NPTEL (2025, 52%)

Introduction to Internet of Things — NPTEL (2025, 57%)

ACHIEVEMENTS

- Won 1st Prize at Expo 2026 for presenting a software project — demonstrating ability to build and communicate product value.
- Participated in Intra-College Hackathon — hands-on experience with rapid prototyping under time pressure.
- Participated in Intra-Department Coding Competition — strengthening algorithmic problem-solving skills.
